

Ideation Phase

Empathize & Discover

Date	11 September 2026
Team ID	Individual Project
Project Name	ServiceNow Based Employee Laptop Request Application
Maximum Marks	4 Marks

Empathy Map Canvas

An empathy map is a simple visual tool used to understand a user's needs, thoughts, feelings, behaviours, and difficulties.

For this project, the primary user is an employee who needs a laptop and wants a clear, reliable way to submit and track a request. The map also considers interactions with the manager and IT support team.

Project-specific Empathy Map:

Empathy Map – Employee Laptop Request

ServiceNow Based Employee Laptop Request Application

User Understanding – Employee Laptop Request

Empathy Area	Project-Specific Findings
Think & Feel	Wants a simple request process, clear approval status, and timely laptop delivery.
Hear	Manager and IT team expect complete and accurate request details.
See	May see manual follow-ups, different request methods, and limited status visibility.
Say & Do	Submits the request, provides justification, checks status, and responds to corrections.
Pain	Approval delays, repeated follow-ups, and uncertainty about request progress.
Gain	Centralized request form, automated approval, status tracking, and a clear fulfilment process.

Key User Problem

Employees need a centralized and transparent way to request a laptop because manual or unclear processes can make it difficult to know whether a request was submitted, approved, or completed.

Proposed Direction

Build the process in ServiceNow so employees can submit a structured laptop request, managers can approve or reject it, and the IT team can process approved requests while the request status is maintained in one place.

Project-Related Interface Example

The screenshot shows the ServiceNow interface for a 'Laptop Request - LAPREQ0001'. The form is divided into two main sections. The left section contains fields for 'Number' (LAPREQ0001), 'Status' (pending), 'Reason' (New Employee), 'Employee Email', 'Asset Description', and 'Approval Status' (Pending). The right section contains fields for 'Type of Laptop' (Standard Laptop), 'Requester' (Abel Tuter), 'Date' (2026-09-09 03:04:56), and 'Manager' (System Administrator). At the bottom, there are 'Update' and 'Delete' buttons.

ServiceNow Laptop Request Process

The following workflow represents the intended journey from employee submission to laptop fulfilment.

Laptop Request Workflow

Automated ServiceNow Process

ServiceNow updates request status and maintains request history

Expected Outcome

- Employees can submit requests using a structured form.
- Managers can review and approve or reject requests.
- IT can process approved requests with clear status information.
- The complete request history is maintained in ServiceNow.
