

Project Design Phase

Problem – Solution Fit Template

Date	13 September 2026
Project Name	Service Now Based Employee Laptop Request Application
Student Name	Chinthakuntla Susmitha
Maximum Marks	2 Marks

1. Customer / Target Group

Employees who require a laptop and managers or IT personnel responsible for reviewing and processing employee laptop requests.

2. Customer Problem

In organizations, employees may need laptops for new joining, software development, replacement, or other work requirements. Manual laptop requests can involve emails, messages, spreadsheets, and repeated follow-ups. This can cause delays, incomplete request information, difficulty tracking approval status, and poor visibility for employees and managers.

3. Proposed Solution

The proposed solution is a ServiceNow based Employee Laptop Request Application. Employees can submit a structured laptop request with requester details, employee email, request date, asset description, manager, laptop type, reason, and status. The request can be processed through ServiceNow Flow Designer with manager approval and email notifications.

ServiceNow – Employee Laptop Request

Requester	
Employee Email	
Request Date	
Asset Description	
Manager	
Type of Laptop	
Reason	
Status	

Figure 1: Employee Laptop Request application form

4. Problem–Solution Fit

The solution fits the problem because it replaces an unstructured manual process with a centralized ServiceNow application. Employees receive a clear way to raise requests, managers can review and approve them, and the organization can track request status and communication from one system.

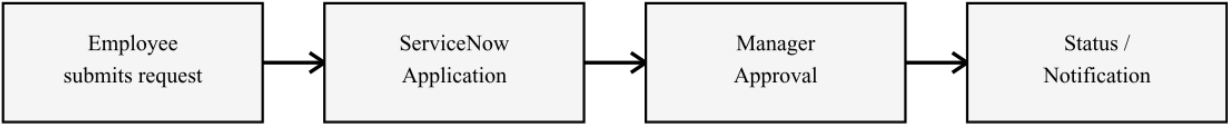

Figure 2: Employee Laptop Request workflow

5. Key Benefits

Benefit	How the application helps
Centralized requests	All employee laptop requests are maintained in one ServiceNow table.
Faster approval	Manager approval can be handled through a ServiceNow workflow.
Better tracking	Request status can be monitored instead of relying on manual follow-ups.
Complete information	The request form collects important employee and laptop details.
Notifications	Email notifications keep relevant users informed about request activity.

6. Expected Outcome

The application is expected to make employee laptop requests more organized, transparent, and easier to manage by providing a structured request form, approval workflow, status tracking, and automated notifications in ServiceNow.

The uploaded template defines Problem–Solution Fit as finding a customer problem and ensuring that the realized solution actually solves that problem. ■filecite■turn0file0■L8-L20■
