

Project Design Phase Solution Architecture

Date	15 February 2025
Project Name	ServiceNow Based Employee Laptop Request Application
Maximum Marks	4 Marks

Solution Architecture

The ServiceNow Based Employee Laptop Request Application uses ServiceNow to manage the complete laptop request lifecycle. Employees submit requests through the Laptop Request Form, the data is stored in the Laptop Request Table, and Flow Designer automates the approval process. Managers approve or reject requests, while Notifications inform employees of the result. Business Rules and ACLs provide validation, automation, and role-based security.
