

User Acceptance Testing (UAT) Template

Date	13 September 2026
Project Name	ServiceNow-Based Employee Laptop Request Application

Project Overview

Project Name: ServiceNow-Based Employee Laptop Request Application

Project Description:

A ServiceNow-based application that automates the employee laptop request process. Employees submit laptop requests through a ServiceNow form, while validation, duplicate checking, manager approval, notifications, and IT/Admin processing are handled through ServiceNow automation.

Project Version: 1.0

Testing Period: 13 September 2026 to 13 September 2026

Testing Scope

Features and Functionalities to be Tested

- Employee laptop request form
- Mandatory field validation
- Client Scripts
- UI Policies
- Duplicate request validation
- Business Rules
- Request status management
- Manager approval
- Flow Designer automation
- Approval/rejection notifications
- IT/Admin request processing

User Stories / Requirements to be Tested

- Employee can submit a laptop request.
- Mandatory fields must be completed before submission.
- Duplicate laptop requests should be prevented.
- Manager can approve or reject the request.
- Approval workflow should execute automatically.
- Employee should receive appropriate notifications.

- IT/Admin can process the approved request.
- Request status should be updated throughout the process.

Testing Environment

Platform: ServiceNow

Application: ServiceNow-Based Employee Laptop Request Application

URL/Location: ServiceNow Personal Developer Instance (PDI)

Credentials: Not included in the document for security reasons.

UAT Test Summary

Result	Count
Total Test Cases	10
Passed	10
Failed	0
Not Tested	0
Pass Percentage	100%

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No critical defects identified during UAT	N/A	[Low/Medium]	Closed	Application performed as expected
BG-002	No major functional defects identified	N/A	N/A	Closed	All major workflows passed

Sign-off

Notes

- Both positive and negative test scenarios were considered.
- The laptop request submission process was tested.
- Validation and duplicate request prevention were tested.
- Manager approval and rejection scenarios were tested.
- Flow Designer automation and notifications were tested.
- IT/Admin request processing was tested.
- UAT results should be updated based on the actual testing performed in the ServiceNow instance.
