

CUSTOMER JOURNEY MAP

ServiceNow Based Employee Laptop Request Application

Project Name	ServiceNow Based Employee Laptop Request Application
Project Type	Individual Project
Platform	ServiceNow
Date	11 September 2026

Customer Journey Map

A customer journey map describes the employee's experience while requesting a laptop through ServiceNow. It shows the main steps, interactions, touchpoints, feelings, pain points, goals, and opportunities for improvement.

Scenario

An employee needs a laptop for work and uses the ServiceNow application to submit the request, obtain manager approval, track IT processing, and receive the laptop.

Employee Laptop Request Journey

Journey Stage	Employee Experience / Actions	Interactions & Touchpoints	Feelings	Pain Points	Opportunity
1. Identify Need	Employee realizes a laptop is required for work.	Company policy, Service Portal, manager or IT information.	Uncertain / hopeful	Unclear requirements or process.	Provide clear guidelines and FAQs.
2. Submit Request	Employee opens ServiceNow, enters details, and submits the request.	Laptop Request Form, Service Catalog, ServiceNow portal.	Hopeful / confident	Too many fields or missing information.	Keep the form simple and validate required fields.
3. Manager Approval	Manager reviews and approves or rejects the request.	Approval notification, ServiceNow approval, email/in-app alert.	Anxious	Approval delays and manual follow-ups.	Automate approval notifications and reminders.
4. IT Processing	IT checks availability, assigns/orders the laptop, and updates the request.	IT Service Desk, ServiceNow workflow, status updates.	Relieved	Unclear status and waiting time.	Provide real-time tracking and automated updates.
5. Receive Laptop	Employee receives the laptop and confirms completion.	Notification, IT support, ServiceNow request record.	Satisfied	Unclear delivery or closure information.	Send completion notification and maintain request history.

Customer Journey Map – Visual

Key Insights

- Employees need a simple and centralized way to submit laptop requests.
- Automated manager approval can reduce waiting time and manual follow-ups.
- Status updates help employees understand the progress of their request.
- A complete request history improves transparency and tracking.
- The goal is to make laptop requests faster, simpler, and more transparent.

Conclusion

The journey map identifies the employee's needs and challenges from identifying the laptop requirement to receiving the device. The ServiceNow application addresses these challenges through a centralized request form, automated approval workflow, status tracking, notifications, and a clear completion process.
