

Project Design Phase-II

Data Flow Diagram & User Stories

Date	11 September 2026
Team ID	Individual Project
Project Name	ServiceNow Based Employee Laptop Request Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a visual representation of the information flow within a system. For this project, the DFD shows how an employee submits a laptop request, how ServiceNow stores and routes the request, how the manager approves or rejects it, how the IT team processes the approved request, and how the employee receives status updates.

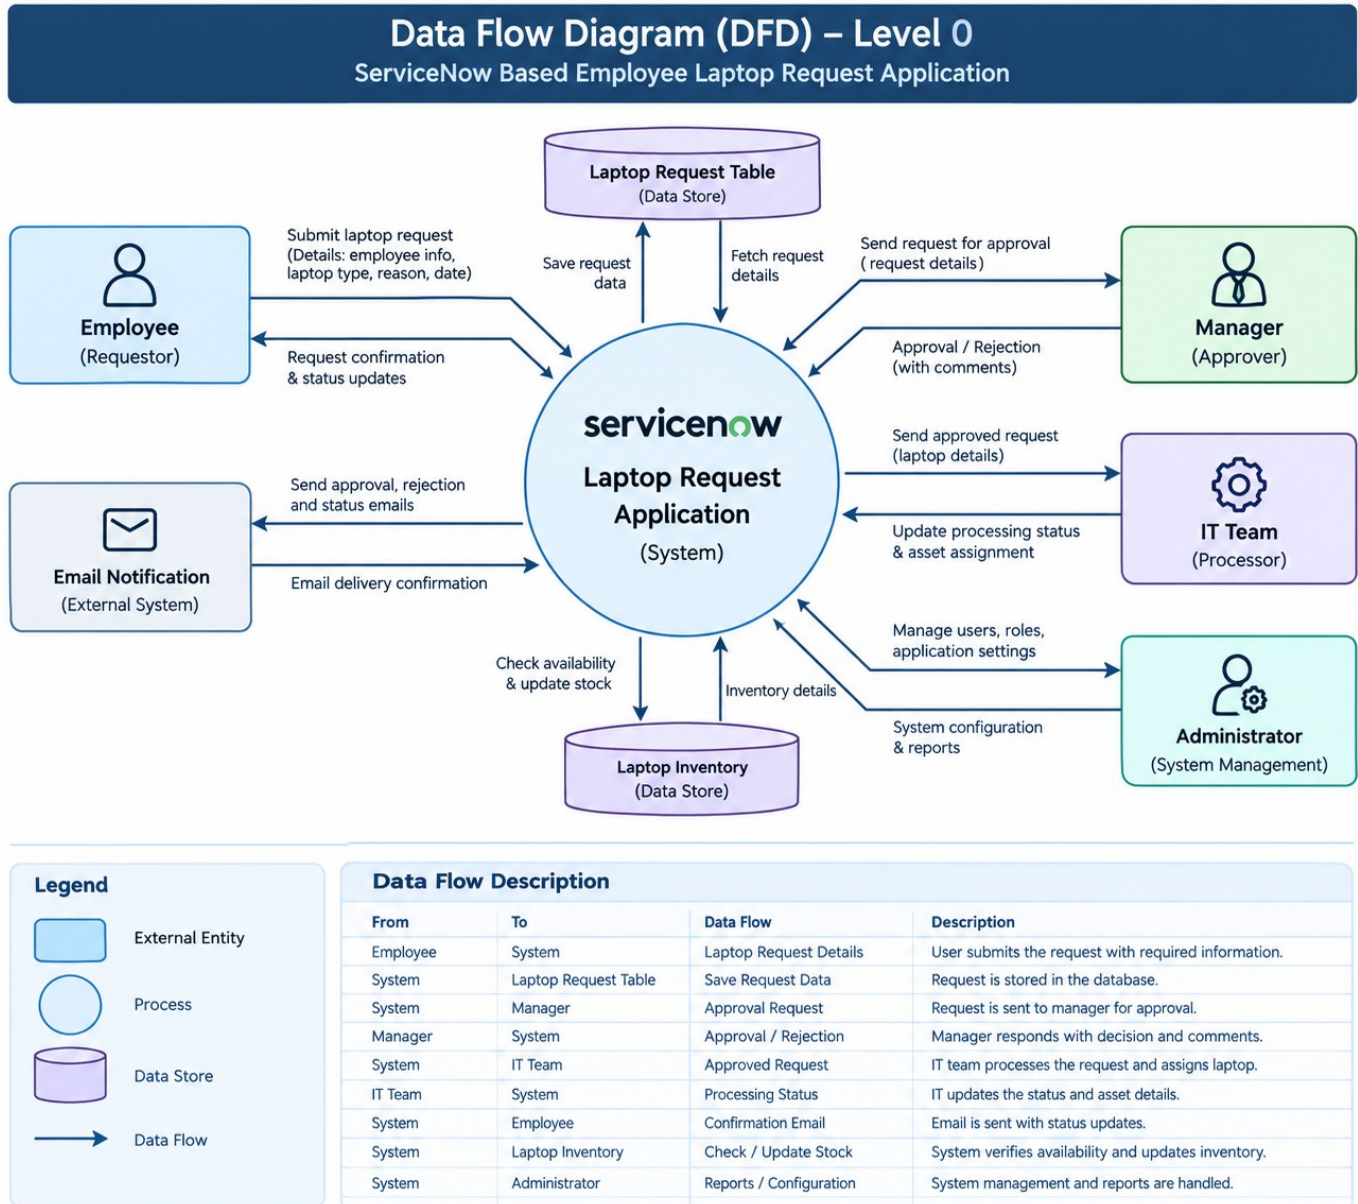

Figure: Simplified DFD – ServiceNow Based Employee Laptop Request Application

DFD Process Flow:

1. Employee enters the required laptop request details in the ServiceNow application.
2. ServiceNow validates and stores the request in the Laptop Request table.

3. 3. The request is routed to the employee's manager for approval or rejection.
4. 4. Approved requests are sent to the IT team for processing and laptop assignment.
5. 5. ServiceNow updates the request status and sends notifications to the employee.

User Stories

Use the below template to list the user stories for the ServiceNow Based Employee Laptop Request Application.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Laptop Request	USN-1	As an employee, I can submit a laptop request by entering the required employee, department, laptop type, required date and reason.	I can complete all mandatory fields and submit the request successfully.	High	Sprint-1
Employee	Request Tracking	USN-2	As an employee, I can view the current status of my laptop request.	I can see the request status and its progress.	High	Sprint-1
Employee	Notifications	USN-3	As an employee, I can receive updates when my laptop request status changes.	I receive a notification after an important status or approval update.	Medium	Sprint-2
Manager	Request Approval	USN-4	As a manager, I can review laptop requests submitted by employees.	I can view the request details required to make an approval decision.	High	Sprint-1
Manager	Request Approval	USN-5	As a manager, I can approve or reject a laptop request.	The decision is recorded and the request status is updated.	High	Sprint-1
IT Support	Request Processing	USN-6	As an IT team member, I can view approved laptop requests and process them.	Approved requests are available for IT processing.	High	Sprint-1
IT Support	Laptop Assignment	USN-7	As an IT team member, I can update laptop assignment and completion details.	Assignment details are saved and the request can be marked completed.	High	Sprint-2
Administrator	Access Control	USN-8	As an administrator, I can control access to laptop request records using roles.	Employees, managers and IT users can access only permitted functions.	High	Sprint-2

Project Outcome

The application provides a centralized and trackable laptop request process. Employees can submit and monitor requests, managers can approve or reject them, and IT Support can process approved requests and record laptop assignment.
